

Petition

TO STOP USE OF RADIOACTIVE WASTE IN CONSUMER PRODUCTS

We, the undersigned, call on the United States President, Vice President, Congress and all federal, state and international regulators and legislative bodies to recapture, stop, and prevent release/clearance/recycling/dispersal of radioactive wastes and materials into consumer products and the environment.

We support regulation and isolation of radioactive wastes from nuclear power and weapons. We oppose the use of radioactive materials and wastes in consumer products and building materials including but not limited to metals, concrete, plastics, glass, paper, wood, soil, and equipment.

We call on the US Nuclear Regulatory Commission (NRC) to reverse its efforts and expenditures to release radioactive wastes and to initiate a policy requiring regulatory control and isolation of all radioactive wastes. We demand the recapture and recall of radioactive materials and wastes that have been released into the marketplace.

*We call on the US Department of Transportation & NRC to reject the proposed exemptions for radioactive materials in transportation regulations, which would permit transport of various amounts of all radionuclides without labeling, regulation or tracking.

We call on the US Department of Energy to halt all releases of radioactive wastes and materials into the marketplace or regular trash, to recapture that which has been released and to immediately revoke their internal orders allowing radioactive release. Expand the ban against radioactive metal recycling to prohibit all radioactive dispersal to commerce.
